

Soundac® Acoustic Louvers

Noise reducing louvers

The Soundac® Acoustic Louvers combine a good noise reduction and low air resistance.

Louvers are very well suited for application in air supply and air exhaust openings of e.g. air treatment rooms, ventilation rooms, boiler rooms, generators, compressors and vehicles.

Description

The louvers are usually constructed of thermal galvanised steel and can be coated on request. The louvers are also available in stainless steel or aluminium and can be supplied with bird fencing.

Properties

- Good noise reduction
- Low air resistance
- Custom build

Front airspeed (m/s)
